

SLICAN XL-606 office phone

A convenient phone with hands-free mode and the presentation of the caller's number.

In addition, a clear display, programmable memory buttons and the history of recent calls will ensure comfortable work organization.

You will quickly connect with the client and check who called during your absence.

Usage facilities:

The phone stores the data of the last 50 incoming calls, including the number, date and time. This makes it easy to see who called and when. In addition, the device remembers the last 15 outgoing calls, which allows full access to the list of the latest calls.

Programmable Buttons:

On the Slican XL-606 phone keypad there are 3 memory buttons M1, M2 and M3, which can be programmed to any telephone numbers. This is a great solution for people who often call the same customers and want to save time.

Cooperation:

The Slican XL-606 phone works with any Slican PBX and other manufacturers' PBXes.

Display:

- 3-line LCD display
- presents the caller's number
- has 5 levels of contrast adjustment
- displays the updated date
- informs about missed calls
